Innovative Design, Unbeatable Quality, Complete Solution

CellTec has been developing and producing Zone Safety Systems guarding for over 10 years and enjoys a reputation as an innovation leader in safety technology for factory automation.

Our Zone Safety Systems have been used in a widely diverse number of applications over the years. Our technical consultants work with you to develop the most effective and efficient solutions – whether this can be achieved using standard products or whether you require an individually engineered solution.

Our Zone Safety Systems modular guarding system is supplied direct from stock. The patented post design allows unprecedented flexibility and rapid deployment. It combines perfectly with our hand rail system ensuring a uniform look across your plant.

Easy to specify, quick to install, reconfigurable and reusable.

A complete range of accessories includes electrical and trapped key interlocks, light curtains and grids, safety relays and controllers, safety mats, warning beacons and sirens.

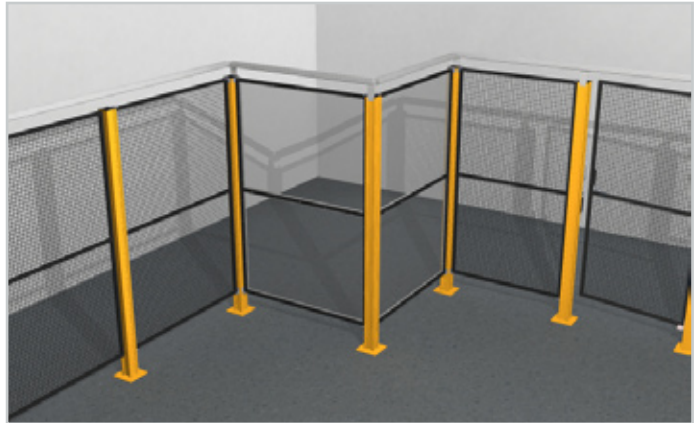

## ZONE SAFETY SYSTEMS

### Perimeter Safety Guarding

>>> **Safe:** Machine Guarding is designed to isolate industrial hazards and to provide compliance to Australian (AS4024.1) and International Safety Standards.

>>> **Fast and flexible:** Our patented 'T' slot post design provides the ultimate in flexibility. Guarding is easy to specify and quick to install, reusable and reconfigurable. A large range of standard sizes are ready for immediate dispatch.

>>> **Local:** Local manufacture allows for special designs and modifications to be delivered quickly. One size does not fit all when it comes to delivering the best result.

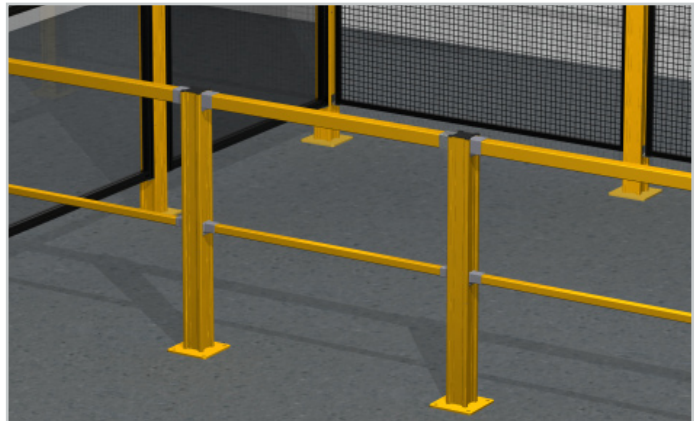

### Personnel Safety Railing System

>>> **Fast:** Our system provides rapid installation without the need for welding or grinding. It's already powdercoated. Install it and you're done, no painting.

>>> **Increased factory safety:** Reducing injuries is dependant upon separating personnel from forklifts and other hazards as they move around factories. Our railing is the ideal solution.

>>> **Attractive:** The safety yellow powdercoated design looks great and retains a uniform look when integrated into our Perimeter Guarding.

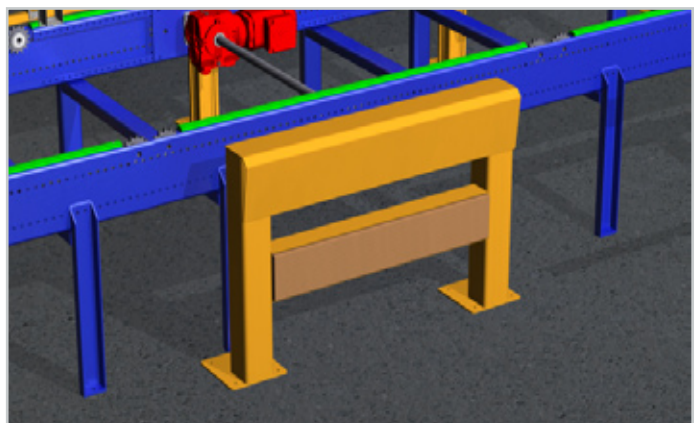

### Impact & Traffic Protection Bollards

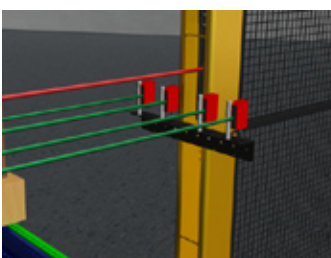

>>> **The right choice:** Surface mount, in ground or custom manufacture ensures the right bollards for your application.

>>> **Strong:** Made from heavy wall material, our powdercoated bollards are made to withstand harsh environments.

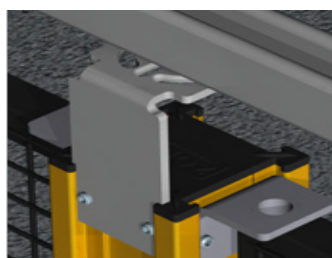

>>> **Protective:** Protection for both personnel and equipment against vehicle and forklift collision.

### >>> INTEGRATED Components & Mounting Brackets

Light Curtains & Muting

Cable Ducting

Beacons & Sirens

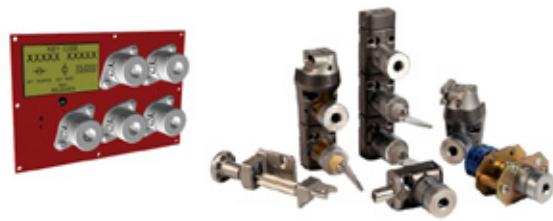

Access Control & Interlocks

### Safety Interlocks

### Trapped Key Systems

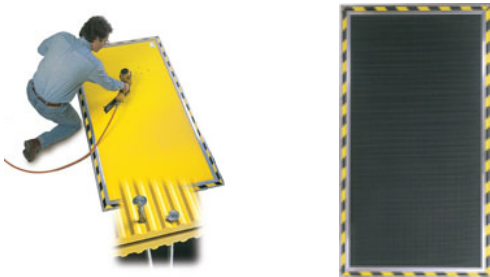

### Optical Safety Systems

### Safety Relays & Extension Units

### Safety Mat Systems

### Warning Beacons & Sirens
