Article: NA B110BB-DMK

Description: Modular prewired switch with roller plunger

Sheet:

32170-0-en-2.1.0

Date: 29/06/2021

Switch pressed

Switch released

Reset engagement travel

Mechanical switching point

Page: 1/4

### Housing:

Metal housing, 20 mm fixing points.

Protection degree: IP67 acc. to EN 60529, IP69K acc. to ISO 20653 (Protect the cables

from direct high-pressure and high-temperature jets)

### General data:

Corrosion resistance housing in saline mist: ≥ 300 hours in NSS according to ISO 9227

Max actuation frequency: 3600 operations cycles/hour Mechanical endurance: 20 million operations cycles

B10D: 40,000,000 for NC contacts

Mechanical interlock, not coded: type 1 according to EN ISO 14119 Vibration resistance: 5 ... 150 Hz (7.9 m/s2) according to EN 61373 cl.9

### Contact block characteristics:

| Con | tact block | Contact diagram | Contact design | Operation type | Positive opening ⊕ | Contact type        | Captive<br>screws | Terminals<br>with finger<br>protection | Gold-plated contacts 1 µm |
|-----|------------|-----------------|----------------|----------------|--------------------|---------------------|-------------------|--|---------------------------|
| B11 | 1NO+1NC    | 47              | Zb             | snap action    | yes                | Double interruption | 1                 | /                                      | yes                       |

#### Contact block travel diagrams:

## Positive switch opening:

Device with positive opening conforming to IEC 60947-5-1.

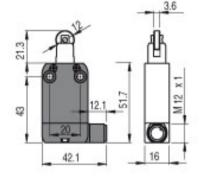

## Device screw tightening torques:

Head screws: 0.5 ... 0.7 Nm
Lever screw: 0.8 ... 1.2 Nm
Connector screw: 0.3 ... 0.6 Nm
M4 fixing screws, body: 2 ... 3 Nm

### Activating forces:

Min.: 7 N

Positive opening: 25 N

## In conformity with standards:

IEC 60947-5-1, EN 60947-5-1, IEC 60204-1, EN 60204-1, EN ISO 14119, EN ISO 12100, IEC 60529, EN 60529, EN 50581, ISO 20653, UL 508, CSA 22.2 No.14.

## In conformity with requirements requested by:

Low Voltage Directive 2014/35/EU, EMC Directive 2014/30/EU, RoHS Directive 2011/65/EU.

# Markings and quality marks:

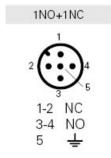

## Electrical data:

Rated impulse withstand voltage (U<sub>imp</sub>): 4 kV Conditional short circuit current: 1000 A according to EN 60947-5-1 Pollution degree: 3

**Important:** Switch off the circuit voltage before disconnecting the connector from the switch. The connector is not suitable for separation of electrical loads. According to EN 60204-1, 2NO+2NC versions with 8-pin M12 and AMP connector can be used only in PELV circuits.

#### Internal connections:

Description: Modular prewired switch with roller plunger

Sheet: 32170-0-en-2.1.0 Date: 29/06/2021

Page: 3/4

#### Characteristics approved by IMQ

Rated insulation voltage (Ui): 250 Vac

Conventional free air thermal current (Ith): 10 A (1-2 contacts) / 6 A (2-3 contacts)

4 A (4 contacts or 5-pin M12 connector)

Protection against short circuits (fuse): 10 A (1-2 contacts) / 6 A (2-3 contacts)

/ 4 A (4 contacts or 5-pin M12 connector), gG type Rated impulse withstand voltage (Uimp): 4 kV

Protection degree of the housing: IP67

MA terminals (saddle clamps)

Pollution degree: 3

Article:

Utilization category: AC15 / DC13 (with connector)

Operating voltage (Ue): 250 Vac (50 Hz) / 24 Vdc (with connector)

Operating current (le): 3 A / 2 A (with connector)

Forms of the contact element: X, Y, X+Y, X+X, Y+Y, Y+Y+X, X+X+Y, X+X+Y+Y, Zb Positive opening of contacts on contact blocks B01, B11, B02, B12, B21, B22, G01, G11, G02, G12, G21, G22, L01, L11, L02, L12, L21, L22, H01, H11, H02 H12, H21, H22

In conformity with standards: EN 60947-1, EN 60947-5-1 + A1:2009, fundamental requirements of the Low Voltage Directive 2006/95/EC.

### Characteristics approved by UL

Electrical Ratings:

R300 pilot duty (28 VA, 125 250 Vdc)

B300 pilot duty (360 VA, 120 240 Vac) (1 cont.)

B300 pilot duty (360 VA, 120 240 Vac) (2 - 3 cont. without connector)

C300 pilot duty (180 VA, 120 240 Vac) (2 - 3 cont. with connector)

C300 pilot duty (180 VA, 120 240 Vac) (4 cont.)

**Environmental Ratings:** 

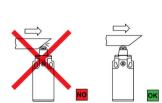

Types 1, 4X, 6, 12, 13

Types 1, 4X "indoor use only" (1 - 2 cont. with "E" type cable)

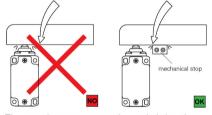

Screws torque of the detachable connector housing nominal are 0.3  $\div$  0.6 Nm.

## Mechanical stop

Acc. to EN ISO 14119 paragraph 5.2 "the position sensors must not be used as mechanical stop".

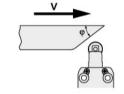

The actuator must not exceed the max. travel as indicated in the travel diagrams.

The guard must not use the switch head as a mechanical stop.

## Actuation speed

| φ   | Vmax<br>(m/s) | Vmin<br>(mm/s) | Vmin<br>(mm/s)<br>R |
|-----|---------------|----------------|---------------------|
| 15° | 1             | 4              | 0,04                |
| 30° | 0,5           | 2              | 0,02                |
| 45° | 0,3           | 1              | 0,01                |

Contacts type:

## **Actuation modality**

| Recommended application | Application to avoid  Possible application but with mechanical stress for the switch higher than expected, mechanical endurance is not guaranteed | Forbidden application |  |  |
|-------------------------|---|-----------------------|--|--|
| ≤45° ≤45°               | >45°  |                       |  |  |

Article: NA B110BB-DMK Sheet: 32170-0-en-2.1.0 Date: 29/06/2021

Description: Modular prewired switch with roller plunger

Page: 4/4

# Installation of single switches with safety functions

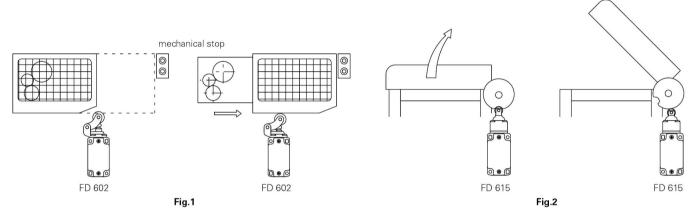

- Use **only** switches with the symbol (
- Connect the safety circuit to the NC normally closed contacts (11-12, 21-22 or 31-32).
- The NO normally open contacts (13-14, 23-24, 33-34) should be used only for signalling; these contacts are not to be connected with the safety circuit. However, if two or more switches are used on the same guard, a connection can be established between the NO contacts and the safety circuit.

In this case at least one of the two switches must have positive opening and a normally closed contact NC (11-12, 21-22 or 31-32) must be connected to the safety circuit.

- Actuate the switch at least up to the positive opening travel shown in the travel diagrams with symbol 🔾.
- The actuation system must be able to exert a force that is greater than the **positive opening force**, as specified in brackets below each article, next to the minimum force value.
- The device must be affixed in compliance with EN ISO 14119.

Whenever the machine guard is opened and during the whole opening travel, the switch must be pressed directly (fig. 1) or through a rigid connection (fig. 2).

Only in this way the positive opening of the normally closed NC contacts (11-12, 21-22, 31-32) is guaranteed.

In safety applications with only one switch for each guard, the switches **must never be activated by a release** (fig. 3 and 4) **or through a non rigid connection** (i.e. by a spring).
